I am a recent Computer Engineering graduate with experience in internships and training programs, focusing on backend development. I thrive in team settings, have leadership experience, and take on responsibilities confidently. My technical skills include the software development lifecycle, adhering to SOLID principles, and building RESTful APIs and dynamic websites using ASP.NET Core. I am seeking an opportunity in an innovative company where I can continue growing, with a focus on mentorship and teamwork.

RELEVANT SKILLS

- OOP
- T-SQL
- MSSQL, PostgreSQL, MySQL
- RESTful Services
- Microservices Architecture
- C#
- ASP.NET Core MVC, Web API
- Java
- Spring Framework
- Entity Framework Core
- Design Patterns (Repository, Singleton)
- JavaScript
- Bootstrap
- HTML5
- Github

WORK EXPERIENCE

KREO SOLUTIONS A.Ş.

Software Development Internship

August 2023-September 2023 (1 month)

At Kreo Solutions, a startup, I learned to achieve significant results with a small team by taking on multiple roles across departments. I strengthened my teamwork skills and gained insights into building and scaling a company. I also worked on REST APIs.

PİNSOFT TECHNOLOGIES AND CONSULTANCY TRADE LTD.ŞTİ. February 2023 to June 2023 (5 months)

Software Development Internship

During my internship, I gained experience in large-scale software development, web applications, enterprise mobility, and business technology consulting. I was trained in Java and Spring Boot for backend coding and later worked on mobile projects with React Native. I developed frontend code for mobile apps, improved my UX/UI design skills, and learned the value of teamwork. I also contributed to a mobile app developed in collaboration with another company, gaining insights into corporate projects. Additionally, I developed my own project using Java and Spring Boot, collaborating with my team on service development.

VİRGOSOL IT AND SOFTWARE SOLUTIONS A.Ş.

Software Development Internship

July 2022 to August 2022 (1 month)

The company, based in Istanbul, provides QA and Software Testing Services. During my internship, I focused on Functional and Non-Functional testing, Test Automation, Performance Testing, and Web Services/API testing. I contributed to various projects, ensuring software quality and reliability. Collaborating with team members, I helped identify and resolve bugs, enhancing my problem-solving skills. I also deepened my understanding of the software development lifecycle and the critical role of testing in delivering high-quality products.

EDUCATION

Tekirdag Namık Kemal University

2019/2023

Bachelor of Computer Engineering

3.1 GPA

Introduction to Computer Engineering - C Programming - Data Structures - Object Oriented Programming - Numerical Methods - Operating Systems - Formal Languages and Automata - Computer Organization - Database Systems - Digital Circuits - Software Engineering

Ozel Kesan Ugur Temel High School

2018

- Chess Team Leader

CERTIFICATES & COURSES

WISSEN AKADEMIE - ISTKA

FullStack-Developer

March 2024-August 2024

I have been awarded a full scholarship for the training program, which is being conducted in collaboration between Istanbul Development Agency and BAU-Wissen Academy. Currently, I am undergoing training in the full-stack domain. The training program spans 480 hours and is expected to conclude in July. Upon completion of the training, I will continue my professional career equipped with the new skills I have acquired.

Training Content: **C# , ASP.Net Core , T-SQL , MSSQL , React-Native , React , JQuery**

BTK Academy Advanced Java

Java

20.09.2023

Advanced Java and Spring boot course.

BTK Academy Introduction To Programming With Java

23.08.2023

Beginner Java Developer course.

GTECH Financial Solutions Academy

Finance, Software

10/07/2023 - 21/07/2023

Analytical Modeling, SQL, Problem Solving, Debugging, OOP, S&F, Flutter, API, Microservice, Docker, Container, Redis, SignalR.

PROJECTS

Rent A Car Website

A dynamic website where users can filter based on reservation date, vehicle type, and location to select and reserve their desired cars. Users can register and log into the system. Users with an admin role can add new cars and locations, as well as manage reservations.

Technologies Used: Asp.Net Core - Entity Framework Core - ASP.NET Core Identity - Microsoft SQL Server - Linq - Razor Pages - Bootstrap - Html - JavaScript

Blog Website

The website has three user types: Guests can register, log in, read articles, and comment. Authors can create articles in the correct format. Admins manage user roles. Articles are searchable and categorized for easy access.

Technologies Used: Asp.Net Core - Entity Framework Core - ASP.NET Core Identity - Microsoft SQL Server - Linq - Razor Pages - CKEditor - Bootstrap - JavaScript - Html

Exchange Restful Api

Exchange is a trading game where users buy and sell stocks at current prices, manage portfolios, and learn trading terminology. The app features hourly stock updates, and admins can add new stocks with unique symbols, prices, and quantities.

Technologies Used: Asp.Net Core MVC - Entity Framework Core - Postgre SQL - Linq
